This assignment will focus on developing a health policy analysis presentation that includes a problem statement, background, landscape, options and recommendations from the week's readings. The health policy analysis presentation is based upon an identified healthcare issue in one's local community.

Activity Learning Outcomes

Through this assignment, the student will demonstrate the ability to:

1. Employ strategies to impact the development, implementation, and consequences of holistic healthcare policies using evidence-based practice principles (CO1)
2. Critically analyze how healthcare systems and APRN practice are organized and influenced by ethical, legal, economic and political factors (CO2)
3. Analyze social, historical, ethical and political contexts of healthcare policies and advanced practice leadership (CO4)
4. Advocate for institutional, local, national and international policies that fosters person-centered healthcare and nursing practice (CO5)

Due Date: Sunday by 11:59pm MT of week 4.

Students are expected to submit assignments by the time they are due. Assignments submitted after the due date and time will receive a deduction of 10% of the total points possible for that assignment for each day the assignment is late. Assignments will be accepted, with penalty as described, up to a maximum of three days late, after which point a zero will be recorded for the assignment. Quizzes and discussions are not considered assignments and are not part of the late assignment policy.

Week 4: Kaltura Health Policy Analysis 3/25/21, 8:41 PM

Week 4 Assignment Recording

10:33 / 10:34 & 1x # "  world another day. So again, I'm more of a narrow focus. It isn't tasting to include recommendations in the problem statement, but this should be avoided. So for instance, a problem statement says, drug abuse can be solved by doing these things. You're operating recommendations and that should be avoided. So now let's take a look at some problem statements from students that have had in the past. So you have a better a better understanding for nurse practitioners. Decreased, rising drug abuse in the local community and promote recovery. How can mental help access achieved them? Self-score community? What action should you can take to reduce occurrences of opioid abuse? What actions will help decrease the incidence of bad lesson tobacco use including beeps. And how can NPS helped to reduce opioid overdose in Camden, New Jersey? So as you read these, you're seeing, you're seeing this is not a treatment, but this is prevention. This is primary care prevention. As a family nurse practitioner working in an outpatient family practice, this is exactly what you will be doing, is you'll be preventing, is it's, it's a much law plus expensive and certainly a lot better for your patients to prevent

1. Research healthcare issues that have been identified in your local community. Develop a power point presentation with speaker notes. You will then use the power point during your Kaltura recording.
