Title: Theory Term paper

Instructions: based on following text book & article- text book - theoretical basis for nursing by mcewen and wills, chapter 10-11, p. 213 – 257. article by - im and meleis (1999). 2 additional references - use 2 nursing journal articles from usa within 5 years (total of 4 references). -using apa writing style, write a three-page paper of your reactions to the study of middle-range and practice theories, include definition of middle-range and practice theory, apply elements of middle-range and practice theory to emergency nursing practice and apply theory as a basis for nursing actions. -identify one client care issue or practice concern in emergency nursing practice. select a middle-range or practice theory from nursing that could be used to address an identified concern. briefly describe the chosen theory. -is your selected theory derived from a grand nursing theory identified by the nurse theorist? if so, which grand theory and concepts were used? if not, can you identify a grand theory where your chosen theory might fit? why? -how can your identified theory be used as a basis for nursing action related to the issue? how can you apply the theory to assessment, diagnosis, planning, implementation, and evaluation of the concern?

Focus: please follow above instruction. also please have client care issue or practice concern relate to an aspect of emergency room nursing practice.

Based on following text book & article-

Text book - Theoretical Basis for Nursing by McEwen and Wills, Chapter 10-11, p. 213 – 257.

Article by - Im and Meleis (1999).

2 additional references - use 2 nursing journal articles from USA within 5 years.

(Total of 4 references).

-Using APA writing style, write a three-page paper of your reactions to the study of middle-range and practice theories, include definition of middle-range and practice theory, apply elements of middle-range and practice theory to emergency nursing practice and apply theory as a basis for nursing actions.

-Identify one client care issue or practice concern in emergency nursing practice. Select a middle-range or practice theory from nursing that could be used to address an identified concern. Briefly describe the chosen theory.

-Is your selected theory derived from a grand nursing theory identified by the nurse theorist? If so, which grand theory and concepts were used? If not, can you identify a grand theory where your chosen theory might fit? Why?

-How can your identified theory be used as a basis for nursing action related to the issue? How can you apply the theory to assessment, diagnosis, planning, implementation, and evaluation of the concern?
